Working Together
for Optimum Performance

From the President

Since incorporation in 2005, PPT Solutions has been providing systems and software engineering services to both government and commercial aerospace customers. Each year, I am encouraged as we continue to develop and maintain strong relationships with our customers and our community. This has been fundamental to our success.

It has also been very rewarding to see our capabilities expand. We continue to seek candidates to add to our team of advanced degreed professionals. PPT is committed to the success of its staff through continuing education and specialized training. As our customers' needs change, our mission remains the same; provide the best people, process and technology to achieve optimum performance.

If you are a current customer, we are grateful for your continued business. If you are a prospective customer, please contact someone from my leadership team to let us know how we may serve you in the future.

Sincerely,

Jim Reeb, President

Mission

We strive to provide the best service and value to our customers, leveraging people, processes, and technology to ensure the highest quality product within cost and schedule. We work together with our customers, as a team, to achieve optimum performance.

Philosophy

From defining the problem to producing the solution, we work side by side with our customers to provide research and analysis of their organization's current capabilities and needs as defined by their people, their process, and their technology.

Commitment

- Customers**
We are committed to helping every customer achieve their goals.
- Employees**
We are committed to ensuring every employee reaches their full potential.
- Community**
We are committed to reaching out and giving back.
